linkedin.com/in/janedoe | github.com/janedoe

Summary

Backend engineer with 6 years building scalable distributed systems. Passionate about developer tooling, data pipelines, and clean API design. Led teams of up to 4 engineers and shipped products serving millions of users.

Experience

Software Engineer II
San Francisco, CA

Acme Corp, Jan 2022 – Present

- Built a Python-based microservices platform handling 2M requests/day
- Reduced API p99 latency from 450ms to 90ms via caching and query optimization
- Migrated monolith to Docker containers, enabling 10x faster deployments
- Mentored 2 junior engineers through code review and pair programming

Tech: Python, FastAPI, PostgreSQL, Docker, AWS ECS, Redis

Software Engineer
Remote

StartupXYZ, Mar 2019 – Dec 2021

- Designed and implemented a real-time event processing pipeline using Python
- Built CI/CD pipelines with GitHub Actions, cutting deployment time by 60%
- Owned the data ingestion API used by 50+ enterprise customers
- Collaborated with data science team to productionize ML model serving

Tech: Python, Flask, Celery, MySQL, Redis, Terraform, GitHub Actions

Projects

pystream (github.com/janedoe/pystream) — Python, Kafka, asyncio
Open-source library for building event-driven microservices in Python.

- 800+ GitHub stars; used in production by 3 companies
- Implemented backpressure handling and exactly-once delivery semantics

Education

University of California, Berkeley
B.S. Computer Science, May 2019

GPA: 3.7

Skills

Languages:	Python, SQL, Go (learning), Bash
Frameworks:	FastAPI, Flask, SQLAlchemy, Celery
Infrastructure:	Docker, Kubernetes, Terraform, AWS (ECS, S3, RDS, SQS)
Databases:	PostgreSQL, MySQL, Redis, MongoDB
Tools:	Git, GitHub Actions, Jenkins, Prometheus, Grafana
